

## AQUAPONIC-ThinkFest Workshop - Friday, 27 March 2020

The term “aquaponics” may be used for a system that in a more intensive way combines aquaculture with hydroponics. The idea behind the system is that the plants utilize the waste from an aquaculture system as nutrients for plant production, and the clean water is then returned to the fish. The plants ensure no accumulation of toxic substances in the aquaculture system.

This ThinkFest will be a wonderful opportunity to assess what is happening on local Aquaponics farms in terms of research and development. Come and listen to the real experiences of established Aquaponics farmers. What are the opportunities or obstacles in the sector? The afternoon session will be a panel discussion to assess how best to find solutions to the problems faced by the collective.

To register to attend: Visit the website <https://www.aasa-aqua.co.za/conferences/>

*The workshop is open to conference delegates and to those who only wish to attend the workshop.*

Cost: R450 per person – incl. tea/coffee session, lunch voucher and presentations will be made available after the workshop to all Aquaponic workshop participants.

Time: 08:00 – 17:00

Venue: Room 2118, Van Der Sterr Building, Bosman Street, Stellenbosch University, Stellenbosch

Enquiries: Henk Stander, [hbs@sun.ac.za](mailto:hbs@sun.ac.za)
